Study period on IoT devices Security and/or Privacy baseline controls

Rapporteurs	Laura Lindsay, Mahmoud Ghaddar, Asbjorn Hovito
Attendees	A list of attendees to all the meetings will be distributed in a separate document.

1. Abstract

Review of proposal from the US on creating a 6 month study period on IoT devices security and/or privacy baseline controls.

2. Comments and contributions received

2.1 Overview

Reviewed the proposal made by the US with the justification of why this study period to be should be created. Created a term of reference.

2.2 Input documents

Document	Number
Contributions	WG4 N2768

3. Focus of discussions

Discussion centred on what the scope of the study period would be and what the input could be. It was agreed that the study period would initially include all IoT devices and during the study determine what the scope should be and what would be out of scope based on the information collected.

4. Outgoing liaison statements

4.1 Requests for liaisons (if applicable)

Organization	Title	Motivation
ISO PC 317		This SP aligns with the consumer aspect of privacy that is covered by PC 317. So as to not duplicate work and to make sure that the appropriate level of understanding is included in the SP.

4.2 Organizations for liaison (if applicable)

Organization	Title
ISO/IEC JTC 1/SC 41	

4.3 General text for liaison statement (if applicable)

SC 27/WG 4 is doing a 6 month study period to identify what the IoT devices Security and/or Privacy baseline controls requirements that may currently exist and any applicable existing work.

5. Recommendation/s resulting from the meeting

Formal recommendation/s for the WG 4 recommendations and resolutions.

Next stage	New SP
New ToR?	Yes
New rapporteurs	Yes, see above
